Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koda et al. in view of Matsuura et al. (65662/1992).

Regarding claim 1, Koda et al. disclose in "Ozone detector" a semiconductor sensor that changes resistance in response to ozone and a pulsed operation of the sensor increasing the sensor operating temperature to a first temperature (400-800°C) and then decreasing the operating temperature to a second temperature (200-500°C) (Pages 1-6). Koda et al. do not disclose where the film is tungsten trioxide (WO₃). However, Koda et al. disclose where the SnO₂ film can be substituted with films of In₂O₃, ZnO etc... . Matsuura et al. disclose in "Sensor of oxidizing gases" that WO₃ can be substituted with In₃O₂. Therefore, to replace the filter in the Koda et al. with WO₃ would be well within the purview of the skilled artisan since it is already known to interchange the filters from

Koda et al. and Matsuura et al. By applying this feature the user would be able to change the sensitivity of the apparatus.

Regarding claim 3, Koda et al. disclose where the sensor resistance is analyzed as a function of time (Figures 1 and 5).

Response to Arguments

3. Applicant's arguments with respect to claims 1 and 3 have been considered but are moot in view of the new ground of rejection.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to André K. Jackson whose telephone number is (571) 272-2196. The examiner can normally be reached on Mon.-Thurs. 7AM-4PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hezron Williams can be reached on (571) 272-2208. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
